Me listening my friends problem

Is this Sentiment Analysis

When Named Entity Recognition (NER) Tags a Human Name as a Location

Hey, this is a person, not a place

**When the sentiment analysis
model classifies 'I love
suffering' as positive sentiment**

My model predicting
'positive' sentiment.

My model when it sees
sarcasm

**My model works
perfectly in English!**

“My name is Akash”

But when i write in hinglish

“Mera naam Akash hai”
